

I am a strong supporter of the K-LOVE Radio Network and DO NOT want to see the FM translator stations forced to reduce, in any way, their transmitting capability or power. PLEASE REGISTER MY OBJECTION TO LPFM LOCALIZING! As a resident of the San Antonio, Texas community, and formerly of the Carlsbad, New Mexico; Kennewick, Washington; Midland, Texas; and Andrews, Texas communities, the services provided to me and my family of four small children have been invaluable. The station provides a musical alternative to the negativity, violence and immorality offered to my children on all other radio station--including stations like Radio Disney! My children and I choose to focus on positive, moral avenues to deal with life and K-LOVE helps us do that. The loss of K-LOVE in any one of the markets in which we have lived would be devastating--especially to the children and teenagers who are so influenced by the icons and role models offered to them by the music industry. K-LOVE goes far in providing positive role models and verbal and musical encouragement to its listeners. All of the services provided by the K-LOVE Radio Network are most definitely in the public interest. And the FCC would do a severe disservice to the public in the national radio market to allow LPFM Localizing to adversely affect, in any way, the accessibility of citizens to K-LOVE radio stations provided on FM Translators!
